The surface finishing process can differ depending on the defects. Larger defects will need sanding down before polishing to a mirror finish, whereas smaller defects may only require polishing.

**TIPS:**
- Ensure surfaces are thoroughly clean before polishing to prevent additional defects being applied to surfaces.
- Ensure surfaces are thoroughly clean before use. Poor compound can clog pads and damage surfaces.
- Never use a dirty cloth!

Farécla’s compounds use Engineered Abrasive Technology developed by our scientists in a state-of-the-art R&D facility. Only the highest-quality raw materials are used to ensure the engineered particles quickly, efficiently and permanently remove defects, such as scratches, sanding marks, swirls, holograms and oxidation.

**FILLERS**

Farécla use abrasives to permanently remove defects. Fillers are a quick way to give the temporary illusion of a polished finish. These don’t stop the ongoing wearing down of defects to return. Farécla’s engineered abrasive technology prevents comebacks and provides a permanent finish.

**WHY POLISH THE SURFACE?**

Defects have a variety of negative effects on visible light which the eye perceives as a reduction in surface quality. Polishing the surface removes the defects which can no longer affect light, leaving a high-gloss finish.

For the first step in exterior maintenance detailing, ideal for touchless cleaning before full exterior work. High foaming action softens and lifts dirt, making it ideal for removing damaging particles without touching the surface. Use for general maintenance cleaning. For heavy duty cleaning use G3 Pro Snow Foam Plus. Can be used as a shampoo - 2 capfuls to a 15 ltr bucket of lukewarm water.

For the first step in exterior heavy duty detailing, ideal for touchless cleaning before full exterior work. High foaming action softens and lifts dirt, making it ideal for removing damaging particles without touching the surface. Use for deep cleaning. For general maintenance cleaning use G3 Pro Snow Foam. Can be used as a shampoo - 2 capfuls to a 15 ltr bucket of lukewarm water.

G3 Pro Multicleaner is a rigorous solution that is safe to use on all soft and hard surfaces, from carpets and upholstery, interior and exterior vinyl, all the way to wheel arch liners and engine bays. It is a silicone-free product that will not discolour rubber, plastics, vinyl or fabric.

Silicone-free tyre dressing which provides an even, non-tacky, factory-finish look and feel. Prevents discolouration and premature cracking of your tyre wall and will not degrade your tyres in any way, even when used on a regular basis.
